

Customer module side bug/changes:

1. The filter on results screen (after filling book now form) are not working, moreover the dropdown on filter side were wrong. The following should be implemented in the filter option:
 - Number of seats→ as displayed in the merchant module while adding a vehicle.
 - Fuel Type → Keep the same.
 - Price→ Keep the same.
 - Sub categories→ As mentioned by admin in the [management page](#).

2. Instead of no data found, when current city is not according to the system. Please display following message “Sorry for the inconvenience, currently we are not available in your city. Please change your location”.

3. Please consider the following on results page when booking type is outstation and travel distance is >200km:

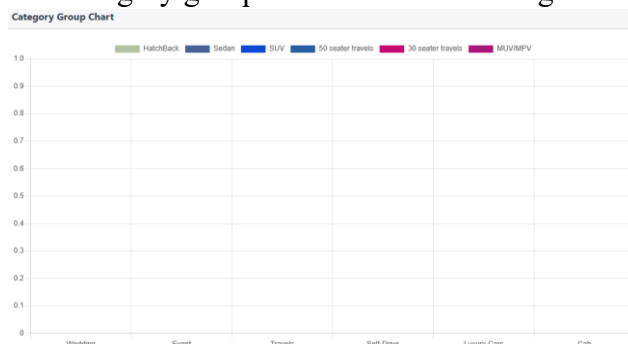

4. Help centre is not working, we don't see where the queries are redirecting.
- On the booking details page, please display merchant name and contact details.
5. The booking page should display the estimated total price for local and self-drive travel type. However, when the travel type is outstation, the estimated total price will be based on total travel distance as:
 - When distance < 200 km \rightarrow display (rate for 200 km + halt charges, if applicable)
 - When distance > 200 km \rightarrow display (rate as Rs. X/ km + halt charges, if applicable)

Merchant side bugs:

1. Search bar is not working, it should result merchant's vehicle based on the input.
2. On booking details page please add customer name, contact number, pick-up address.
3. On booking details page, the estimated total price will be same as discussed in point 5 (customer side bugs).
4. The notification page is not active till now. Please add number function, count the unread notification. Moreover, unread notification be dark to appear and read should be light to appear as conventionally used.

Admin Side bugs:

1. The category grouped chart is not working.

2. Unread notification should be dark to appear and read should be light to appear as conventionally used.
3. The chart reserved car Vs unreserved car chart not working properly. Please count the car as reserved one, if the booking for that car is either fall in ongoing or upcoming booking.
4. In the view [booking page](#), please show the pickup address for particular booking.
