

Merchant side bugs:

1. Please increase the 'doors' count on merchant side while adding the cars.
2. Please don't show the "self-drive cars names" or "cars added in self-drive" category while adding the new car by merchant.

This page is not working .

6. Please remove toaster notifications.

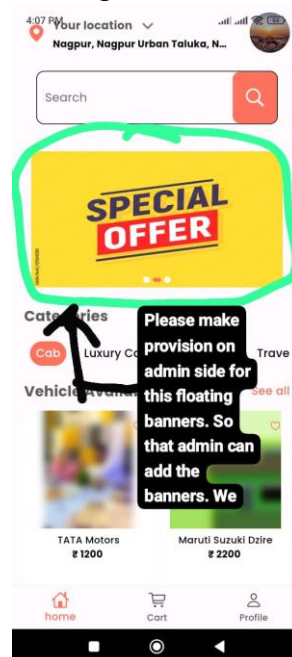

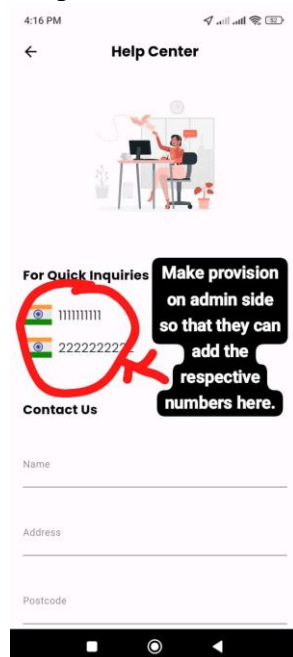

7. Although merchant has completed the trip, no update on trips and earning page.

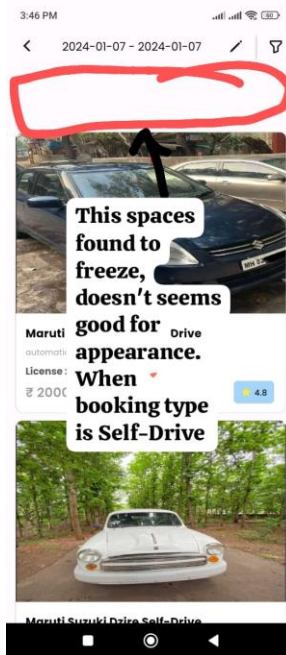

- Availability calender not working, the car is still visible although the date was selected from calender.

User side

- Please add provision on admin side for the following.

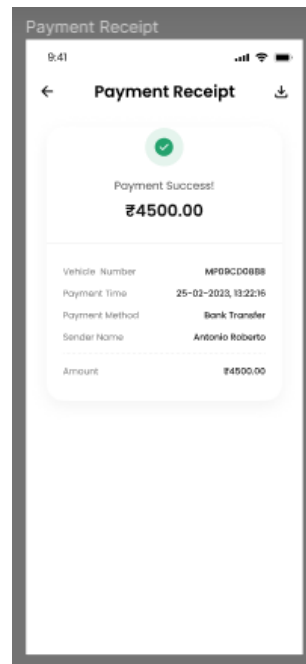

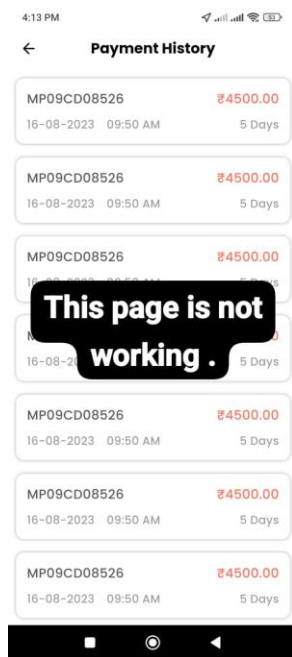

- When the booking trip type is self-drive:

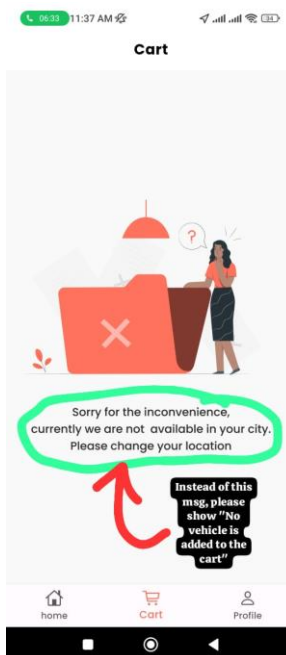

3. Please add merchant name and contact details on booking details page.

4. Payment history page isn't working and make provision to download payment receipt.

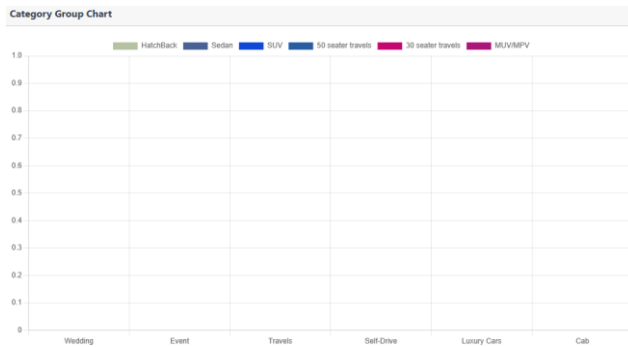

5. For cart page:

6. Please shown the 15 hrs pricing on home page and home page for self-drive category ex. 5000rs /15 hrs.
7. Please add notification bell, we don't see notification anywhere. However, it was mentioned in the Figma screen.
8. Please add call button on consumer side booking page for reserved vehicle booking to connect with respective merchant.
9. Don't blur any vehicle on home page apply the respective logic on result screen (which appears after book now).
10. When the user jumps to book now screen anyhow, the local should be selected trip type unless user make the selection.

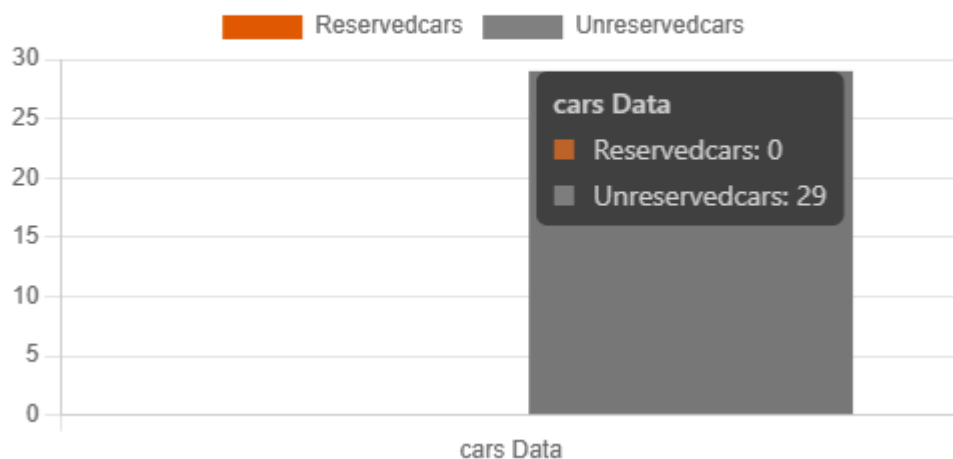

Admin side

1. The category grouped chart is not working.

2. The chart reserved car Vs unreserved car chart not working properly. Please count the car as reserved one, if the booking for that car is either fall in ongoing or upcoming booking.

Reserved & Unreserved Cars

3. In the view [booking page](#), please show the pickup address for particular booking.
4. In admin panel please show contact number and name of merchant while accepting the "vehicle KYC".
5. On the view vehicle page, the instead of merchant name the company name is displayed, please check.
