Push up which are not working:
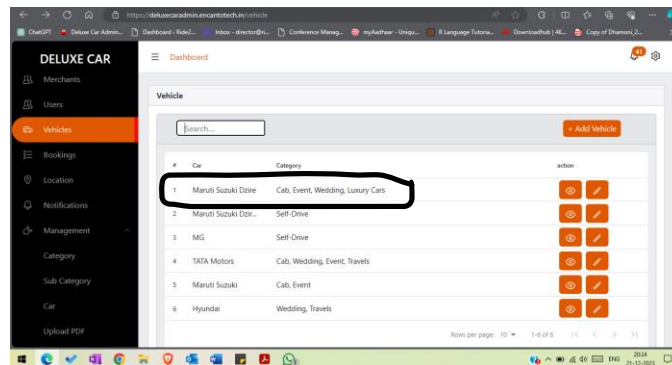

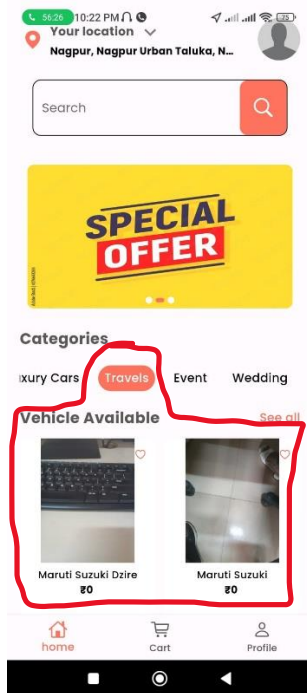

1. KYC approval and rejection notifications are not working on merchant side.
2. Booking update notification not seen on admin side.
3. Booking confirmation and update notification not seen on merchant side.

Problems on Consumer Side:

1. The vehicle is not added to travels category still it is visible in it.

2. The notification number on admin side should disappears when they were sorted.
3. If consumer book a vehicle with travel type please display the following on result page:
   a. If travel distance <200 kms displays fixed amount.
   b. If travel distance>200kms displays rate Rs./kms.
4. The token amount is not displayed on car details page for outstation booking.
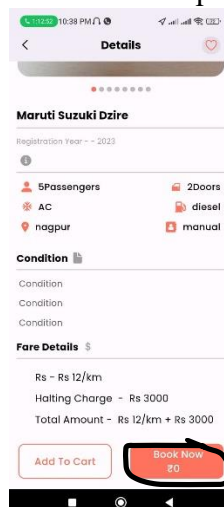

5. The payment page order summary is not according to booking (address & car). The view detailed bill text is not working.

6. If the vehicle is already booked as per user date and time it should be blur to show unavailability.
7. The vehicle added to only luxury is visible in wedding as well.
8. When a consumer book vehicle with self-drive option, two documents must be upload from there side driving licence and Aadhar. Please make provision on merchant and admin side to the uploaded documents.

9. The condition applied by the admin are not visible on consumer side.
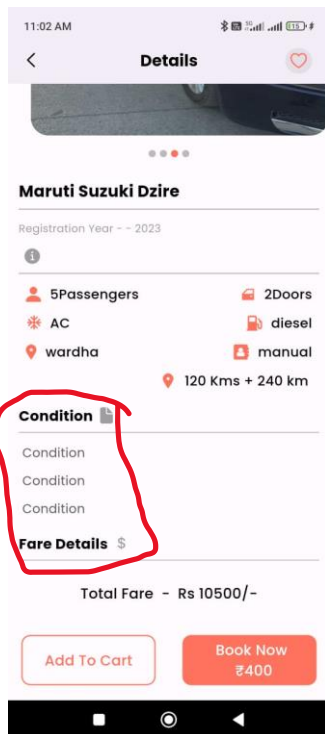

10. On book now page keep the local option as default.
11. The images of vehicle and document are not perfectly please applying a perfect crop image option so that they appear pleasant.
12. Please add self-drive as category option on home page.
13. When user completely exit the application and reopen the it, the application should be taking user's current location.
14. The user can edit the booking of vehicle only when the respective vehicle is available as per data fed by user. If the vehicle is not available, please pop-up a notification to display customer care number and it should redirect to the help centre page.

Merchant side problems:

1. When merchant clicks on any vehicle from car list page, a blank page appears.
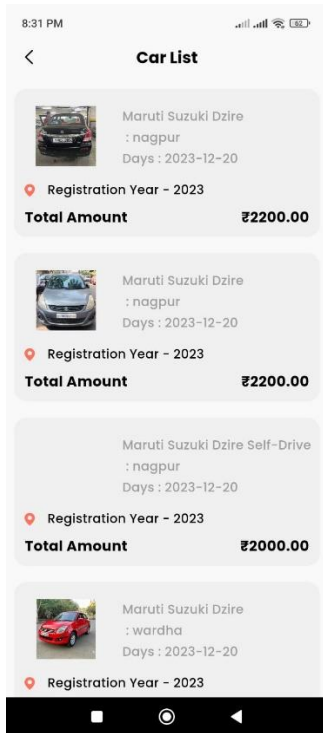

2. notification of car reserved and ongoing and completed on merchant side not working.
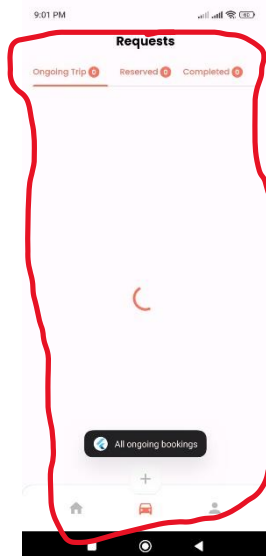

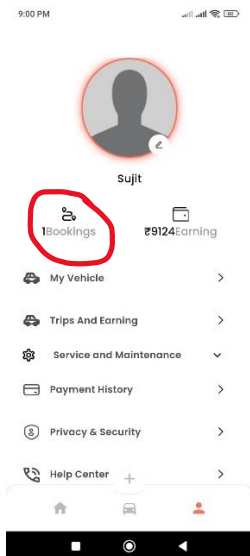

3. When a merchant select outstation and local, still the self-drive option is open for them.

4. The merchant cannot delete the vehicle directly, first the notification has been sent to admin, when admin reject that vehicle, it should be deleted.
5. Please develop a page on merchant side to show the whole booking details when clicks on booking.
6. Please add a calling button for on booking request page for future and ongoing booking to connect with consumer. Do the same for consumer side to connect the merchant.
7. Please provide a confirmation button on ongoing trip to inform the journey is completed.
8. The vehicle online-offline is applicable for the present calender date only when the vehicle is not already booked for present calender date.
9. Please add unavailability calender in the edit vehicle page as suggested earlier to make that unavailable for selected calender date, only when the vehicle is not already booked for the selected calender date.

Admin side problems:

1. In the view booking, please add vehicle information such as vehicle images and car registration number.
2.
